SUMMARY

Backend engineer writing production APIs and infrastructure since 2022: Bun + Hono TypeScript services with documented endpoints, auth, caching, and queues, running on self-hosted Docker, Coolify, and Traefik with real observability.

SKILLS

Languages	TypeScript, JavaScript, Python, SQL, Dart
APIs	Bun, Hono, Node.js, Express, FastAPI, REST, GraphQL (Apollo), OpenAPI/Scalar, SSE, WebSocket, JWT, Zod
Data	PostgreSQL (Drizzle, Aiven), MongoDB (Mongoose), MySQL (Prisma), Redis, Cassandra, MeiliSearch
Async	BullMQ, RabbitMQ, node-cron, webhooks, Slack alerts
Infra	Docker, Coolify, Traefik, Tailscale, MinIO (20TB), AWS, GCP, OpenTelemetry + SigNoz, Prometheus

EXPERIENCE

Independent Software Engineer · freelance and contract	Jun 2022 to present
Genuinst · Founding Engineer (Contract)	Jan 2026 to present
- Built the Bun + Hono TypeScript API: Zod validation, JWT rotation, rate limiting, OpenAPI/Scalar docs. - Moved the stack off high-cost cloud to Docker, Coolify, Traefik, and Tailscale; self-hosted MongoDB, Redis, RabbitMQ, and a 20TB MinIO cluster, ending recurring storage bills. - Integrated Surepass KYC, OpenTelemetry + SigNoz, PostHog, Slack alerts, and Resend email.	
Swalook CRM · Full-Stack Developer	Jan 2026 to present
- Bun + Hono + Drizzle backend on PostgreSQL, Redis, and BullMQ; 35+ OpenAPI-documented REST endpoints. - Ran deployments on Vercel and Render for concurrent merchant workloads.	
Aviz Health · Full-Stack Developer	Dec 2025 to present
Built the Bun + Hono + MongoDB backend with Redis for real-time matching, booking, and SOS dispatch.	
Earlier clients: Aorta, BhawBhaw, Niti Health, Dpizza Time (hotel, pet-services, healthcare, food apps).	
Thhiya · Full Stack Developer	Nov 2025 to Jun 2026
- Built Puppeteer pipelines that seeded compliance data for 195 countries (payroll, benefits, tax, entities). - Cut API latency by 20% with session-token validation, Prometheus metrics, and Zod request validation.	
The Neural Networker · Web Development and React Native Intern	Jun 2025 to Nov 2025
AI-integrated Next.js and React Native interfaces; MongoDB index tuning for 30% faster analytics dashboards.	
Huselk · Associate Software Developer (Team Lead)	Feb 2022 to Apr 2023
Led a squad shipping a Flutter e-commerce app (Firebase, Razorpay) and its admin panel.	

PROJECTS

Tenet PG Management. Hono + MongoDB API with JWT (jose), SSE live updates, UPI payments, WhatsApp Cloud API, PDF invoices, node-cron jobs, and Pino logging.

Self-hosted AI agent stack. Local LLM inference, n8n workflows with MCP tool servers, and RAG pipelines over Qdrant and Chroma, running on my own hardware.

EDUCATION AND RECOGNITION

- B.Tech, Information Technology, A.D. Patel Institute of Technology (CVM University), 2022 to 2026
- 1st place, FinTech track, CHARUSAT-Odoo Hackathon 2025 (650+ applicants) · Technical Leadership Award, Apr 2025
- Certifications: Google Cloud Associate Cloud Engineer, AWS Cloud Practitioner, MongoDB Node.js Developer, Meta Front-End Developer, DataCamp SQL Associate
