

Jay Patel

Software Engineer · Full-Stack, Mobile and Applied AI

Anand, Gujarat, India · +91 83200 36851 · hello@jayptl.me · jayptl.me · linkedin.com/in/jayptl-rq · github.com/jayptl-me

SUMMARY

Software engineer who embeds with clients and ships their systems end to end, since 2022. I turn ambiguous requirements into production integrations: payments, KYC, real-time video, maps, compliance data, and AI features, then run them on infrastructure I set up myself.

SKILLS

Integrations	Cashfree, Razorpay, UPI, Surepass KYC, Agora RTC, Google Maps, WhatsApp Cloud API, webhooks
Full-stack	TypeScript, Next.js 16, React 19, Bun, Hono, Node.js, REST, OpenAPI, SSE, WebSocket
Applied AI	Gemini API, RAG (Qdrant, Chroma), MCP tool servers, Ollama, n8n, PyTorch, Hugging Face
Data and infra	PostgreSQL, MongoDB, Redis, BullMQ, Docker, Coolify, Traefik, AWS, GCP, OpenTelemetry
Mobile	Flutter, Riverpod, React Native, Firebase, ML Kit

EXPERIENCE

Independent Software Engineer · freelance and contract Jun 2022 to present

Genuinst · Founding Engineer (Contract) Jan 2026 to present

- Built the Bun + Hono TypeScript API: Zod validation, JWT rotation, rate limiting, OpenAPI/Scalar docs.
- Moved the stack off high-cost cloud to Docker, Coolify, Traefik, and Tailscale; self-hosted MongoDB, Redis, RabbitMQ, and a 20TB MinIO cluster, ending recurring storage bills.
- Integrated Surepass KYC, OpenTelemetry + SigNoz, PostHog, Slack alerts, and Resend email.

Aviz Health · Full-Stack Developer Dec 2025 to present

- Architected three Flutter apps and a Next.js 16 admin console; live on Google Play.
- Integrated Google Maps routing, Agora RTC video consultations, Cashfree payments, and Firebase Auth.

Swalook CRM · Full-Stack Developer Jan 2026 to present

- Led a ground-up rebuild into a Next.js 16 Turborepo, including a multi-tenant super-admin with role-based access.
- Bun + Hono + Drizzle backend on PostgreSQL, Redis, and BullMQ; 35+ OpenAPI-documented REST endpoints.

Earlier clients: Aorta, BhawBhaw, Niti Health, Dpizza Time (hotel, pet-services, healthcare, food apps).

Thhiya · Full Stack Developer Nov 2025 to Jun 2026

- Built Puppeteer pipelines that seeded compliance data for 195 countries (payroll, benefits, tax, entities).
- Integrated Google Gemini for provider matching and compliance insights.
- Cut API latency by 20% with session-token validation, Prometheus metrics, and Zod request validation.

The Neural Networker · Web Development and React Native Intern Jun 2025 to Nov 2025

- AI-integrated Next.js and React Native interfaces; MongoDB index tuning for 30% faster analytics dashboards.

Huselk · Associate Software Developer (Team Lead) Feb 2022 to Apr 2023

- Led a squad shipping a Flutter e-commerce app (Firebase, Razorpay) and its admin panel.

PROJECTS

Self-hosted AI agent stack. Local LLM inference, n8n workflows with MCP tool servers, and RAG pipelines over Qdrant and Chroma, running on my own hardware.

Vini and Tini. Small language models trained from scratch in PyTorch. Vini: ~50M BitNet b1.58 edge assistant, ~1.05B-token pretrain, instruction tuning in progress. Tini: ~85M dense TypeScript coder, 46h on a T4, published on Hugging Face (jayptl-rq/tini).

EDUCATION AND RECOGNITION

- B.Tech, Information Technology, A.D. Patel Institute of Technology (CVM University), 2022 to 2026
- 1st place, FinTech track, CHARUSAT-Odoo Hackathon 2025 (650+ applicants) · Technical Leadership Award, Apr 2025
- Certifications: Google Cloud Associate Cloud Engineer, AWS Cloud Practitioner, MongoDB Node.js Developer, Meta Front-End Developer, DataCamp SQL Associate
